

QWIKCUFF

Medical restraint re-invented.

SAVE TIME. SAVE MONEY. **SAVE LIVES.**

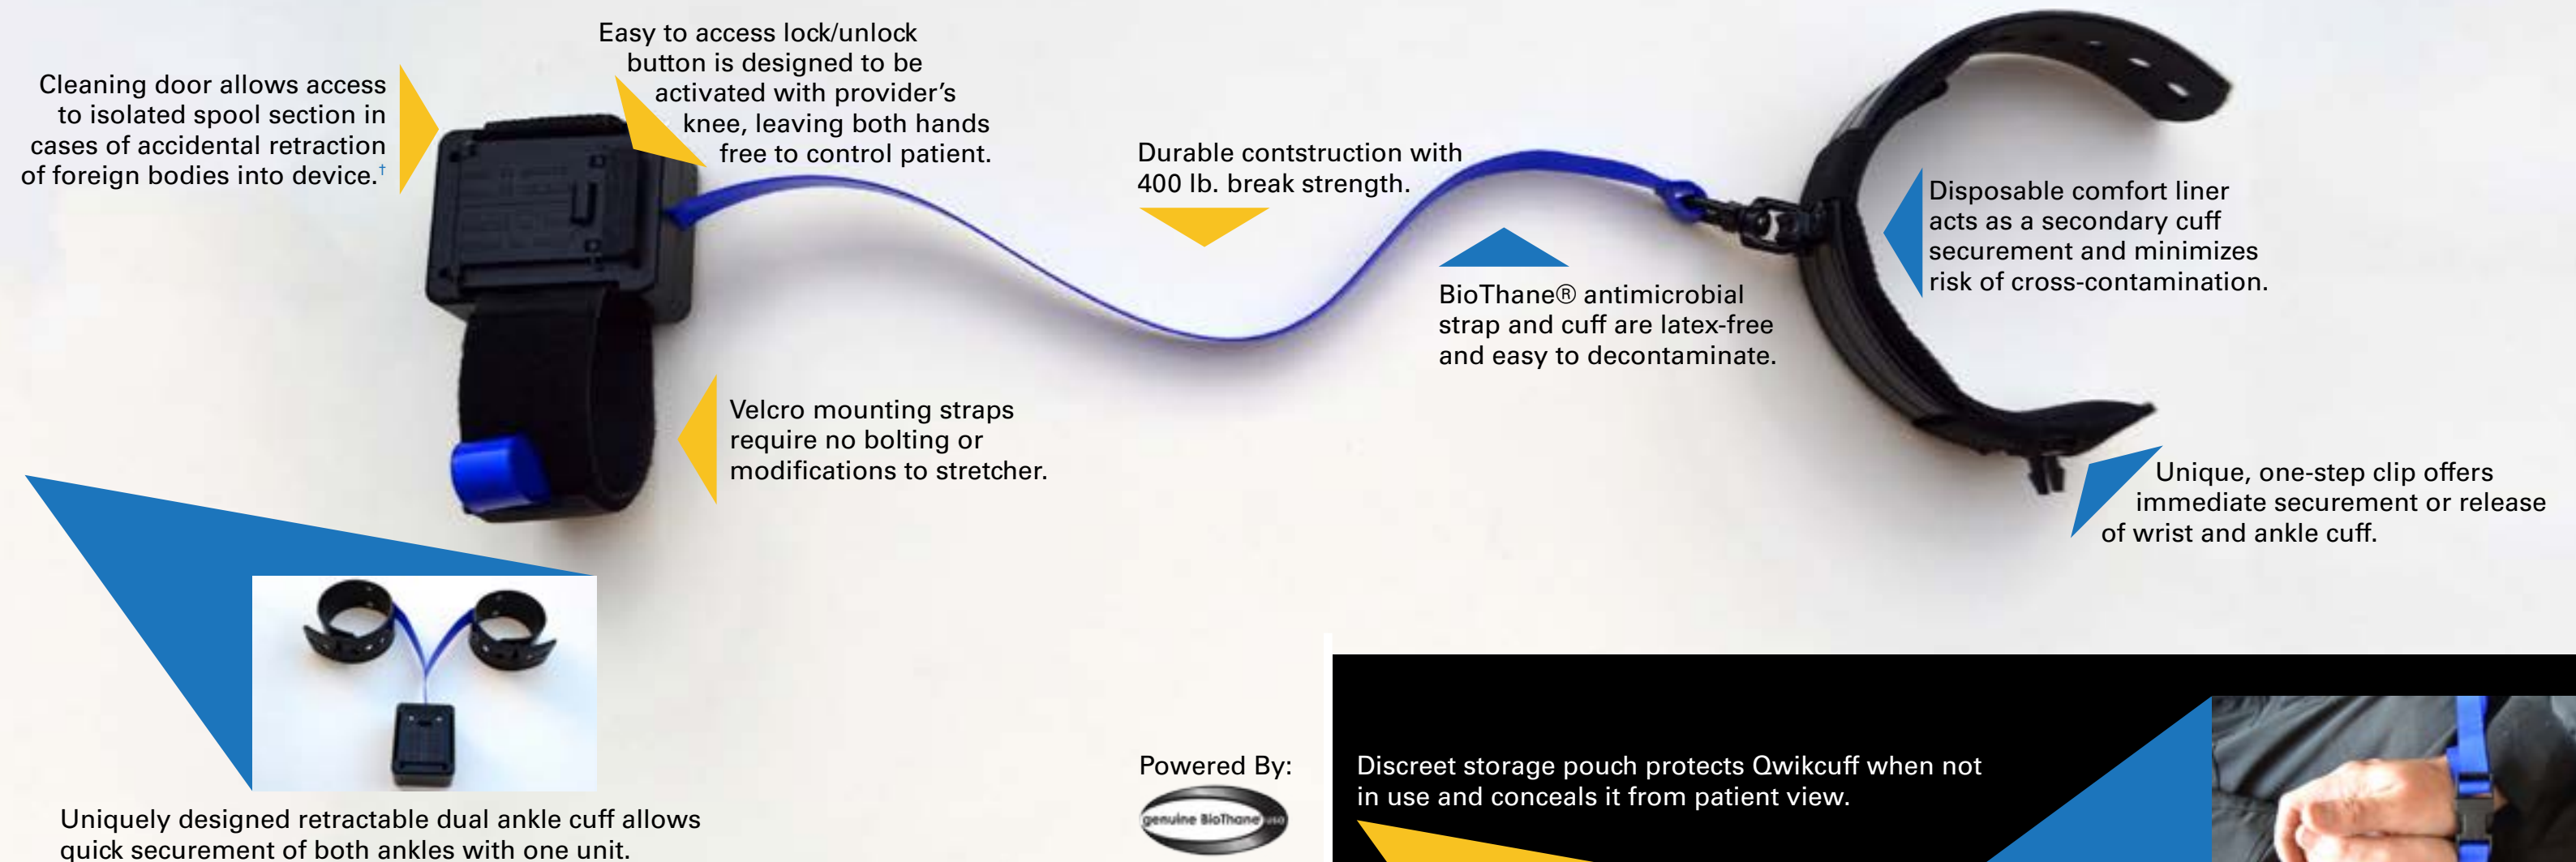

QWIKCUFF

Every day, EMTs, paramedics, and healthcare providers across the country face the difficult task of initiating the patient restraint process. This job is only made harder by the cumbersome restraint products that are currently utilized.

Qwikcuff was inspired by the real-life problems observed with common medical limb restraints. Without the need for loops or tying special knots, Qwikcuff restraints can be applied 3x faster than traditional devices so that life-saving treatment can begin sooner than ever.

FEATURES

- 3x faster than traditional restraints, no need for loops or special knots.*
- Built-in & ready when needed for easy access.
- Budget-friendly: Reusable design saves money.
- 75%-90% annual savings on restraint costs due to its reusability. The only maintenance cost is new comfort liners.
- Eco-friendly: Produces less waste than disposable whole restraint systems.

ABOUT

Qwikcuff is the first and only retractable, built-in medical limb-restraint system. Hundreds of hours were spent collaborating with hospitals and EMS personnel to develop a product that simply works. The result is a faster, easier, and more cost-effective tool that increases safety for both patients and their healthcare providers.

Discreet storage pouch protects Qwikcuff when not in use and conceals it from patient view.

BONUS: Qwikstrap wrist-to-wrist holder included in storage pouch, prevents an unconscious patient's arms from sliding off stretcher.

*Results based on simulated non-combative restraint applications
†Engineering in progress

QWIKCUFF QWIK FACTS

Qwikcuff is a safer, faster way to complete the difficult but critical task of physical patient restraint.

- Qwikcuff is a retractable, reusable medical limb-restraint system. It is intended for use on patients whose altered mentation disrupts life saving interventions or treatments.
- Qwikcuff is 3x faster than other medical restraints. No more time wasted tying loops or knots, and no bending or kneeling.
- Qwikcuff is designed to be pre-mounted on all stretchers where traditional restraints are utilized. No bolts or modifications required.
- Qwikcuff is reusable and built to last.

QWIKCUFF SYSTEM INCLUDES

- 2 Qwikcuff retractable soft wrist restraints
- 1 Qwikcuff retractable soft ankle restraint (dual cuff system)
- 3 protective cases
- 4 disposable comfort liners
- 1 Qwikstrap wrist-to-wrist holder

Total system weight: 2.5 lbs

Retractable Device

Strap break strength: 400 lbs.
Strap width: 0.75 in.
Strap expanded length: 43 in.
Device height: 2.5 in.
Device length: 3 in.
Device width: 1.5 in.

Qwikcuff Soft Wrist Restraint

Width: 2 in.
Length: 12 in.

Qwikcuff Soft Ankle Restraint

Width: 2 in.
Length: 14 in.

ABOUT DAVID DUFEK

“Throughout my career as a paramedic with almost a decade of experience, I have noticed an all too common problem in the healthcare field that other providers and myself struggle with everyday. This problem is the method required to apply limb restraints currently utilized in the field. Qwikcuff is my solution, making this process not only easier but offering a significant risk reduction to healthcare providers and their patients as well.” —David Dufek, Qwikcuff Inventor

“

“Qwikcuff is a **proactive tool**. It’s always there and ready when needed.”
—EMT, Volusia County, FL

“**Speed** is the key feature to me. The speed will provide for a safer environment.”
—MD, Ormond Beach, FL
